DOMANDE INGLESE – 13.11.2023

QUESITO 1: FAO

The Food and Agriculture Organization (FAO) is a specialized agency of the United Nations that leads international efforts to defeat hunger. It was established in 1945 and helps developing countries and countries in transition modernize and improve agriculture, forestry and fisheries practices, ensuring good nutrition and food security for all.

What is the objective of the Food and Agriculture Organization?

QUESITO 2: WEEKENDS

Saturdays and Sunday are days when people don't usually work or go to school and like to use the time to stay with family or friends. Traditionally Saturday is the favourite day for Brits to do shopping, DIY (Do It Yourself) jobs around the house or gardening. In the evening they like to eat out in a restaurant, invite friends to their house or go to the cinema.

How Britains traditionally spent Saturdays?

QUESITO 5: SPORT IN BRITAIN

Sport is very important for British people and children of all ages take part in many sporting activities: in British schools you can find well-equipped gyms and there are also football pitches, tennis courts, or even a swimming pool in many of them. Sports help to improve social skills such as self-discipline, cooperation and team spirit and for that reason they are a very important part of the school curriculum.

What are the main advantages of practising sports for children?

QUESITO 6: SOIL EROSION

Soil erosion is a gradual process of movement and transport of the upper layer of soil (topsoil) by different agents – particularly water, wind, and mass movement – causing its deterioration in the long term. It is globally threatening food security and the functioning of ecosystems. It has an adverse effect on water and air and, of course, on the soil itself. As things stand, soil is being lost at a significantly greater rate than it is being created.

What are the main agents that effect soil erosion?
